GKG Business plan 2025-2030

1.Executive Summary & Vision Executive Summary:

Golden Kitchen Garden Rwanda Ltd (GKG) is a social enterprise founded in 2020 lead by a young Entrepreneur Mr. Jean de Dieu TWAGIRIMANA. Company address the critical nexus of rapid urbanization, land scarcity, and food insecurity through Promoting Climate-Smart Agriculture (CSA). By transforming under utilized spaces into productive, edible landscapes, we foster economic resilience among women, youth, and PWDs.

2. The Problem:

- Rising population vs. stagnant land availability.
- High rates of stunting and malnutrition in schools.
- Poor waste management (lack of circular economy practices).
- Food Insecurity
- Women ,youth and PWDs Jobless

3.The Solution (GKG Programs):

- **Climate Smart Agriculture:**Advancing Climate resilience and sustainable Agricultural Practices.
- **AgriFood innovation and Technorogy:** Supporting innovative solutions and technologies transforming Agro eco and food systems
- **Nutrition Food Security:**Improving nutrition outcomes and strengthening food security for all
- **Circular Economy Solutions:**Promoting circular approaches that reduce waste and create sustainable value.
- **Sustainable Food Systems:** Building inclusive resilience and sustainable food system from farm to table
- **Digital Solutions and Value Chains:**Enabling digital transformationand strengthening food value chains

4.Strategic Objectives (2025–2030) To scale our impact, GKG aims to transition from a service provider to a National hub for urban agricultural excellence.

Strategic Roadmap:

- **2025–2026 (Consolidation):** Expand current pilot programs and strengthen partnerships with National and international NGOs and local government.
- **2027–2028 (Technology & Scale):** Implement IoT-based irrigation systems in school gardens and introduce advanced organic composting technologies.
- **2029–2030 (National Expansion):** Establish regional training centers in all provinces of Rwanda to decentralize our expertise.

Key Performance Indicators (KPIs): Goal Target by 2030

- Trained Women Youth and PWDs Beneficiaries 12,000
- Kitchen Gardens Installed 1,000+
- Institutional Partnerships 150 Schools/Hotels

6. Impact & Operational Model Flagship Program:

Our flagship program, **"Ishuri ry Umurima" (Climate Smart Kitchen Garden Shool)**, is the cornerstone of our social mission. We bridge the gap between rapid urbanization and food security by embedding Climate-Smart Agriculture (CSA) into school curricula and community-led initiatives. This program directly combats childhood malnutrition and stunting by providing consistent access to fresh, chemical-free vegetables.

Beyond nutrition, we drive economic empowerment by facilitating Village Savings and Loan Associations (VSLAs) for women, youth, and PWDs, transforming small-scale farming into a professional, profitable business. Our operational model focuses on circularity utilizing "no-tillage" and "reuse/recycle" techniques to minimize environmental footprints while reducing input costs.

We serve a diverse market through a multi-channel approach: B2C for households seeking self-sufficiency, B2B for hotels and restaurants requiring premium organic produce, and B2G/NGO for institutions committed to health and development. By leveraging AgriFood innovation, digital extension services, and sustainable value chains, we are revolutionizing Rwanda's food systems. From farm-to-table, we foster resilient communities, ensuring that every school, household, and urban space becomes a productive hub of nutrition and economic growth. Through these efforts, GKG is not just farming; we are building a scalable, sustainable future for all Rwandans.

7. Sustainability & Financial Model

Our Hybrid Revenue Framework Golden Kitchen Garden (GKG) Ltd utilizes a diversified, hybrid revenue model designed to ensure long-term financial viability while maximizing social impact. By balancing commercial services with philanthropic outreach, we maintain a sustainable trajectory toward 2030.

8. Commercial Revenue Streams (Service & Product Sales)

- 1. Professional Landscaping & Consultancy:** We provide high-end, edible landscaping services for hotels, restaurants, and private estates and School and Group association and cooperative training. This generates steady cash flow while promoting the "beauty-meets-nutrition" philosophy.
- 2. Agricultural Inputs:** We produce and supply high-quality vegetable seedlings and organic compost selling high quality vanilla supply. These products are developed in-house, ensuring we capture value at the early stages of the food production cycle.

3. Non-Profit Outreach (Grants & Partnerships)

Impact Programs: The Ishuri ryUmurima program is supported through grants and strategic corporate social responsibility (CSR) partnerships. Funding here is ring-fenced to provide training, irrigation tools, and garden kits to schools and vulnerable community groups who cannot afford initial setup costs.

4. Financial Health & Scaling By 2030, GKG targets a 70/30 split between commercial self-sufficiency and grant-funded social expansion. This ensures that even as we grow, our core social mission combating malnutrition remains financially resilient and independent of volatile funding cycles.

9. Strategic Roadmap & Call to Action

Funding Request: The 2025–2030 Expansion Plan To accelerate our mission, GKG is seeking strategic partners, investors, and donors to support our scale-up phase. Our investment will directly catalyze the following areas:

Infrastructure (40%): Procurement of advanced irrigation kits (drip/solar-powered), climate-smart greenhouses, and specialized agricultural tools to enhance yields in high-density school and community zones.

Digitalization (30%): Development of a mobile-based agricultural extension platform. This app will provide our 3,800+ trainees (and future beneficiaries) with real-time advice on crop management, market pricing, and climate data, bridging the digital divide.

Logistics & Reach (30%): Strengthening our transport network to ensure consistent service delivery to remote rural schools and community cooperatives, allowing us to replicate our model nationwide.

10. Why Partner With Us?

Partnering with Golden Kitchen Garden Rwanda Ltd is an investment in systemic change. We are not merely providing food; we are creating a framework for health, economic independence, and environmental stewardship.

Let's grow the future together.
